# WHY ASSAM ?

Why Assam (Guwahati) – Gateway to Northeast Energy Growth Assam, with Guwahati as its commercial capital, is rapidly emerging as a strategic hub for renewable energy and infrastructure development in Northeast India. With abundant natural resources, policy support, and growing energy demand, the region offers immense opportunities for clean energy expansion.

## Strategic Location Advantage:

- Guwahati serves as the gateway to Northeast India, connecting seven states and offering access to neighboring countries like Bhutan, Bangladesh, and Southeast Asia.
- Strong connectivity via road, rail, air, and waterways makes it an ideal destination for trade shows and industry gatherings.

## Hydropower Potential:

- The Northeast region holds over 40% of India's total hydropower potential, with Assam playing a key role in transmission and distribution.
- Major developments in nearby states create strong opportunities for hydro-related technologies, equipment, and services.

## Solar Energy Growth:

- Assam is actively promoting solar energy under state and central schemes, focusing on rooftop solar, solar parks, and off-grid solutions.
- Increasing adoption in residential, commercial, and government sectors is driving market demand.

## Oil, Gas & Hybrid Energy Ecosystem:

- Assam is home to major oil and gas operations led by companies like Oil India Limited and ONGC, creating a strong energy ecosystem.
- This opens doors for hybrid energy solutions, integrating renewables with conventional energy.

## Government Support & Policies:

- The Assam government is actively encouraging renewable energy investments through subsidies, incentives, and infrastructure support.
- Focus on rural electrification and sustainable development is boosting clean energy adoption.

## Emerging Market & Untapped Potential:

- Northeast India remains a largely untapped market, offering first-mover advantage for businesses.
- Growing industrialization, urbanization, and infrastructure projects are increasing energy demand.

## Community & Infrastructure Initiatives:

- Expansion of solar-powered rural electrification, street lighting, and mini-grid projects.
- Increasing focus on sustainable development across districts.

# EMERGING STRONGER THROUGH INNOVATION

## Exhibitor Profile

- Small Hydro Power (SHP) Developers
- Large Hydro Power Companies
- Hydro Turbines, Generators & Equipment
- Dam, Spillway & Water Management Technologies
- Photovoltaic (PV) Modules, Hybrid
- Systems, Materials and Equipments
- Inverters, Charge Controllers,
- Batteries & Module Connectors
- Systems and Solar Pumps
- Testing, Monitoring Systems
- Project Consultants
- Suppliers of Building Integrated
- System Integrators, Assemblers,
- EPC Players
- Glass, Substrates, Coatings, Resins,
- Encapsulation Materials, Films, Gasses
- Wind-solar Hybrid Power System Integrators
- EV & charging infra
- Manufactures & Consultants
- Back-sheet & other components
- BIO Energy
- Government Policies & Initiatives
- Renewable Energy Transition & Energy Security
- Emerging Challenges & Available Options
- Recent Developments & Growth Prospects
- Grid Stabilisation and Ancillary Services
- Integration of Renewable Energy
- Sustainability and Environmental Goals
- Micro Hydro & Rural Electrification Solutions
- Manufacturers & Suppliers
- Distributors & Service Providers
- Photovoltaic Cell Manufactures
- PV Equipment & Materials Manufacturers
- Project Developers / EPC Contractors
- Solar Water Heaters and Systems
- Research Institutes
- Solar end use Manufacturers
- Waste to Energy Project
- Generator Equipment Manufactures
- Wind Power
- Geothermal Heat Pump
- Tidal Power
- Biomass & Bio Gas
- Wave Power
- Total PV Solution Providers
- Service Providers, Finance and Banking
- Community and Investors
- Decentralising and Remote Energy Systems
- Flexibility for Future Energy Mix
- Economic Development and Job Creation
- Renewable Energy Development Incentives
- Infrastructure Optimisation
- Cost-Effective Energy Storage
- Pumped Storage Hydro Systems
- Hydro Project Consultants & EPC Contractors
- Water Flow Monitoring & Control Systems
- Hydro Plant Automation & SCADA Systems
- Rehabilitation & Modernisation of Hydro Plants

## Visitor Profile

- Government Officials & Policy Makers
- Project Developers & EPC Contractors
- Distributors & Channel Partners
- System Integrators
- Banks, VCs, IPPs & Investors
- Architects and Consultants
- Sr. Corporate executives
- Technology developers
- Project Procurement officials
- CEOs, COOs, CFOs, Directors from RE Sectors
- Real Estate Developers
- Commercial & Industrial Consumers
- Facility Managers
- Energy Consultants
- Independent Power Producers, EPCs
- Distributors/ Dealers
- System Installers and integrators
- Ministries, regulatory bodies, municipalities, local, authorities, etc
- Utilities & Project developers and planners
- Project developers and planners
- Investors, Fund Managers, Banks, Financial consultants
- Captive power buyers
- Wind farm owners and Developers
- R&D officials
